ABSTRACT

This document explains the World Wide Web (WWW) and how to use it, with specific reference to sites that would be of interest to those in the fields of language teaching and linguistics. To use WWW, one needs a computer, a modem, and a search engine. Web sites contain text as well as graphics that can be downloaded and edited for educational or personal use. WWW sites are listed for computer software and development, linguistics, class resources, job opportunities, testing, U.S. history, student pen-pal opportunities, international organizations and publications, and specific languages and cultures. Each listing includes the WWW access line and a brief description of its intended use or topic. (NAV)

World Wide Web Resources for Language Teaching and Linguistics

Kenji Kitao Doshisha University, Kyoto, Japan
S. Kathleen Kitao Doshisha Women's College

The World Wide Web is a massive computer database. It is a useful source of information, most of it free. It is very easy to use, even for people who have no experience with computers.

There are thousands of WWW sites (computer-based information stores) all over the world. They hold massive amounts of information, including infomration of academic, personal, general, and commercial interest. Sites are located at universities, libraries, companies, government agencies, etc.

You find WWW sites through direct addressing (typing in a site address), keyword searches, and "stepping stones" from one site to another (text links). Each site has connections to other sites. Certain words are highlighted and underlined in the text, and if you click on those words, you will be connected to another site. You can visit sites all over the world this way, and each site can lead you to more sites. You can find more and more information this way.

WWW sites include text, pictures, sound, computer programs, video, etc. If your computer has the capability, you can see pictures, hear sounds, and view videos.

From a web site, you can download or print text and pictures. You can then edit the text or use the pictures, if you wish.

In order to use the WWW, you need a computer connected to the Internet and a browsing program, like Mosaic or Netscape. Netscape is getting to be the most common program. It provides you with the screen and a set of menus in a setup similar to most Windows applications.

There are many search engines for WWW. You use a search engine by typing in one or more keywords. The search engine will give you a list of the WWW sites that have your keyword(s) in their name or description. This list includes some search engines (Section 14). Netscape also has a search engine.

Using WWW is easy and fun. In fact, your biggest problem may be that it is tempting to spend too much time exploring.

The following is a list of WWW sites that are of interest to linguists and language teachers. The sites are arranged in 18 categories. For each site, the address and the name of the site are provided. In addition, in some cases, descriptions of what is available at the site are also included. Our own comment are marked with **.

THE STUDENT CENTER is a great resource for college and high school students. There's lots of useful information such as student ol info, and there is also fun & entertainment related info for students. What is becoming most popular at the site, however, is the fact that there is an entire area dedicated to students communicating with each other. In this section, there's a Student Homepage Directory. Any student who has their own homepage can put theirs up in this directory, giving their
homepage much increased exposure and making it easier to meet other students.

This is a monthly journal you can read with netscape. It includes articles, research papers, lessons, lesson plans, raw materials for developing lessons, teaching techniques, handouts, and other classroom materials.

Charles Kelly

Call For Submissions

We are always looking for things which are of immediate practical use to ESL/EFL teachers. These can be lessons, lesson plans, classroom handouts, articles, research papers or anything else which is useful. We accept submissions of previously published articles as well as previously unpublished articles. If the submission has been previously published, please include at the top where and when it was published and any copyright information. We will assume that we have the permission of the copyright owner to publish any submission that we receive.

What We Accept

Submissions should be of immediate practical use to ESL/EFL teachers. Purely theoretical papers will not be published.

* Factors which are considered
  - o Is it of immediate practical use to ESL/EFL teachers?
  - o Is the content of interest to a broad readership and not too specialized?
  - o Is it well written?
* Categories
  - o Articles & research papers
  - o Lesson plans, lessons, classroom handouts, etc.
  - o News of interest to the TESL community
  - o Links to articles and lessons already on the internet
  - o Links to ESL teachers' home pages
  - o Links of interest to ESL teachers and students

How to Submit

* E-mail the submission as a text file or formatted as HTML to:
  iteslj@aitech.ac.jp
* Or, you may snail mail the submission as a text file (also include the formatted word processor file) on a Macintosh or MS-DOS disk. to:

Interpersonal Computing and Technology Journal

The Interpersonal Computing and Technology Journal (IPCT-J) is a scholarly, peer-reviewed journal, published four times a year. The journal's focus is on

computer-mediated communication, and the pedagogical issues surrounding the use of computers and technology in educational settings." You'll find full-text articles from 1993 including a cumulative index and you can subscribe to the Listserv forum for IPCT-L as well. An excellent resource hosted at the University of Helsinki, Finland.

How to subscribe/read the IPCT-J and how to submit a contribution?

To read, just click on a highlighted key phrase in the following index. For local (offline) access, download the complete zip package containing the articles of volumes 1 to 3 (1993-1995, not 1996) and unzip it; you will have every issue and every article in your local files. The zipped size is 900 kbytes and the unzipped size is over 2 Mbytes.
To subscribe the original e-mail/listserv distributed edition, send a subscription message
subscribe IPCT-J firstname lastname

The List of Language Lists (Prepared by Bernard Comrie and Michael Everson)
Version 1.A (21 December 1994)

This hypertext (HTML) version prepared by Gavin Burnage, Oxford University Language Centre, January 23rd 1995
Browse Index to List of Language Lists

This file lists bulletin boards devoted primarily to the linguistic study of individual languages and groups of languages (though a couple of others, in particular lists for language learners, have been included as well). It would be great if other correspondents to LINGUIST will be encouraged to maintain corresponding lists for branches of linguistics, particular approaches to linguistics, language teaching, etc.

At the top of the file is an alphabetical list of languages and language groups: for each is given the name of any appropriate list(s). Click on the list name to move automatically down the file to the entry about that list.

Having read the entry, you can either click another list name (if there are others for that language or language group), or click to go back to the top of the index. The usual way of subscribing to a list is to send the following message to the listserver (not to the address for enquiries):
